

SKU: UVC006-CRD

Quick Check UVC Dosimeter

The Quick Check is an easy-to-use colorimetric indicator that lets you SEE if your UV-C devices have delivered a sufficient dose of germicidal irradiation to target surfaces.

Designed for use with UV-C towers, upper air units, handheld devices, cabinets and more, the Quick Check UVC Dosimeter will reveal a check mark at 6 mJ/cm² and will continue to change color to indicate 15 and 25 mJ/cm².

Great for use in hotels, restaurants, offices, schools, fitness centers, public venues, service/shared vehicles or anywhere UV-C disinfection is utilized to combat harmful pathogens.

To order or request a quote, visit UVCdosimeters.com or email info@intellego-technologies.com

- 2"x2" card with adhesive backing
- 25 units per bag
- Single use only – not valid for reuse
- Provides a visual indication of UV-C dose delivered at 254 nm
- Helps ensure the effective and optimal use of UV-C disinfection
- Resealable mylar packaging (4.5" x 6.375")
- 3-year shelf life
